Product owners, software developers, and Scrum Master are set and ideally don't change over time; the critical part is the Release Manager role you need to define here						

<b>Goals</b>	- learn and share learning on tech and collaboration tasks
	- keep Andi Zink happy
	- finish tasks for each sprint on time (or communicate early why it isn't possible or if you need help)
<b>Meeting norms</b>	- be on time
	- be informed on topics relevant for the meeting (eg. lecture)
	- if you are late or can't make it, give a heads up (eg. on slack)
	- active participation
	- let's not digress too much while key points haven't been gone through yet
<b>Working norms</b>	- ask for help
	- decisions made in mutual agreement
	- deliver constructive criticism with the goal of helping others and yourself grow
	- for code: settle on conventions
	- good comments/documentation of work
	- be considerate of varying sets of experiences and skills
<b>Coordination norms</b>	- the Scrum Master keeps the meeting on track and PO leads the meeting
	- the POs (at least, devs are always welcome to join) meet with the partner at regular intervals and communicate / clarify feature requests to the rest of the team.
<b>Communication norms</b>	- be welcoming and nice
	- don't interrupt others
	- communicate illnesses and expected work downtime and what it means for others
	- communication through slack student channel
<b>Consideration norms</b>	- if I disagree, I should think of an alternative/provide constructive reasoning
	- both sides should be heard and find a consensus together
	- prefer to speak in public over speaking privately
<b>Cont. improvement norms</b>	- performance evaluated based on weekly sprint target compared with git pull requests
	- automated tests?
<b>Rewards</b>	- after successful release, we can go to mensa (separately in Erlangen / Berlin)
	- consider meeting in person after the project is completed (in Berlin or Erlangen)
<b>Sanctions</b>	- Start with a warning. Persistent issues can lead to report.

<b>Signatures</b>	
Scrum Master	Simon Zimmermann
Product owner	Georgios Karategos
Product owner	Gemechis Negasa
Software developer	Christian Helbig
Software developer	David Enescu
Software developer	Eloi Sandt
Software developer	Lukáš Varga
Software developer	Yasaman Moradi
Software developer	Jan Potthoff

Product Vision	Project Mission
The reason of existence of the envisioned product (beyond this project).	The mission of this particular project (in the context of the product vision).
